PROJECTS

University project for Cisco Stock Analyzer (Python):

- Led a team analyzing 1990–96 stock data using Python libraries such as Pandas and Numpy, generating visualizations to enhance communication, improve decision-making, and analyze trends. Assigned roles and tasks to team members, set up communication for deadlines and potential issues, and followed up individually with the group on all tasks.

Personal Portfolio Website (HTML/CSS):

- Built and published a personal portfolio website using HTML/CSS and Visual Studio Code, showcasing relevant coursework, my resume, LinkedIn profile, and a zipped file containing all the crucial information for the Cisco Stock Analyzer project.
